SUMMARY

Motivated Computer Science graduate with hands-on experience in full-stack development using JavaScript, Python, ReactJS, Node.js, and MySQL. Skilled in building responsive, user-centric web applications with a strong focus on performance and maintainability. Proven ability to collaborate with cross-functional teams, quickly learn new technologies, and deliver high-quality solutions.

EXPERIENCE

STNUP Private Limited | Front-End Developer Intern  Remote | Oct 2023 - Jan 2024

- During my 4-month internship, I developed and implemented foundational web development skills in HTML, CSS, JavaScript, and React.js, creating reusable components and optimizing code for scalability and maintainability.
- Gained practical experience with debugging, version control using Git, and applying basic front-end design principles.
- Gained a strong understanding of web development workflows while collaborating within a dynamic team environment.

SKILLS

Programming Languages : Python, HTML5, CSS3, JavaScript (ES6)
Libraries/Frameworks : ReactJS, Node.js, Bootstrap, Tailwind CSS, RESTful APIs
Tools / Platforms : Git (GitHub), Visual Studio Code, Vercel, Netlify
Databases : MySQL, MongoDB
Soft Skills : Problem-solving, Communication, Adaptability

EDUCATION

SREE VENKATESWARA COLLEGE OF ENGINEERING - JNTUA Computer Science and Engineering - B.Tech	Nellore, AP 2020 - 2024
NARAYANA JUNIOR COLLEGE Mathematics, Physics, Chemistry	Nellore, AP 2018 - 2020
LITTLE ANGELS E.M HIGH SCHOOL SSC	Nellore, AP 2017 - 2018

CERTIFICATIONS

- Certified in JavaScript, React JS - **Stnup Private Limited**
- Azure Fundamentals Certified - **Microsoft**
- Google Cybersecurity Certified - **Coursera**
- Python Certified - **Hacker Rank**

PROJECTS

Weather Classification GUI Application using Python

- Focuses on multi-class weather classification using supervised machine learning techniques and deep learning features.
- Utilizes the VGG16 model for feature extraction from weather images.
- Implements two classifiers: Random Forest and Naive Bayes for classification.
- The workflow includes dataset upload, image preprocessing, model training, evaluation, and testing.
- Displays performance metrics such as accuracy, precision, recall, and F1 score.
- Features a Tkinter-based GUI that allows for dataset upload, model training, testing on new images, and visualizing performance with confusion matrices and comparison graphs.

Food Delivery Web Application Using ReactJS

- Developed a food delivery platform using ReactJS, JavaScript, HTML, CSS, and Bootstrap inspired by the Swiggy model.
- Designed a responsive and interactive user interface, allowing customers to browse, order, and track food deliveries.
- Implemented React's component-based structure to manage dynamic content such as menu items, order summaries, and delivery status.
- Gained hands-on experience in front-end development, including state management and event handling.

Interactive Image Sliding Puzzle: A JavaScript GUI Project

- Image puzzle created using HTML, CSS, and JavaScript.
- Users can interactively solve the puzzle by dragging and rearranging the pieces to reconstruct the image.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
